20 PARKING LIFTS

Single Post Parking Lift

Overcome tight garage dimensions with the Kett[™] 20 Single Post Parking Lift — the most space-efficient way to double your parking capacity. Also known as a 1-post car stacker or one-post parking lift, the 20 uses a single self-standing column mounted to the floor. With no side columns whatsoever, both vehicles enjoy 100% free door opening and unobstructed side access at all times. Powered by a reliable hydraulic cylinder + chain drive, the 20 quietly elevates up to 2000 kg, transforming even the narrowest bay into a two-level parking space.

KEY FEATURES

- Single column design — one side remain completely unobstructed
- Full car-door opening access on one side of the both level vehicle
- Hydraulic cylinder + roller chain drive with 2,000 kg rated capacity
- Compact footprint ideal for narrow bays and tight residential garages
- Low 130 mm platform entry height for vehicles with low ground clearance
- Mechanical safety latch on column engages automatically when platform is raised
- 24V DC safe control voltage with corded handset and optional wall panel
- CE certified; powder-coat or hot-dip galvanized finish options

TECHNICAL SPECIFICATIONS

Rated Capacity	2,000 kg
Lifting Height	2,100 mm
Drive System	Hydraulic Cylinder + Roller Chain
Platform Size	4,014 × 2,017 mm
Motor Power	2.2 kW
Column Configuration	1-Post (rear centre)
Entry Ramp Height	130 mm
Control Voltage	24V DC
Side Clearance	Fully open on all sides
Safety Locks	Mechanical latch, column-mounted
Best For	Tight spaces, narrow bays
Certification	CE Marked
