3ED CAR STACKERS

Double Wide Triple Stacker — 6-Car

Kettp 3ED Double Wide Triple Stacker is the pinnacle of high-density vehicle storage — a tri-level lift with dual-width platforms that elevates two vehicles side-by-side per level, storing a total of six cars in just two parking bay footprints. With 4000 kg capacity per dual platform, the 3ED handles heavy crossovers and SUVs on every tier. Electromagnetic automatic lock release provides one-button convenience. Powered by a 4.0 kW hydraulic unit at 24V DC safe voltage, the 3ED is engineered for the most demanding dealership, collector, and commercial storage applications worldwide.

KEY FEATURES

- Parks 6 vehicles (2 upper + 2 middle + 2 lower) in one structural footprint — equivalent to two triple stackers
- 4 combined post double-wide frame make the system extra strong
- One set of 4kw hydraulic unit
- Foldable upper boarding ramps store flush when upper platforms are in use
- Heavy-duty 4,000 kg per platform
- Mechanical safety locks at all eight columns, full-range engagement
- Double Mechanical Lock + Wire Rope Protection
- CE certified; preferred for automobile dealerships, collection storage and commercial operators

TECHNICAL SPECIFICATIONS

Rated Capacity	4,000 kg per platform
Total Vehicles	6 (2 upper + 2 middle + 2 lower)
Levels	3
Drive System	Hydraulic + Steel Wire Rope
Column Configuration	4 Combined Post Double-Wide
Motor Power	4.0 kW per bay motor
Upper Ramps	Foldable, flush-store
Control Voltage	24V DC
Safety Locks	Mechanical at all 4 columns
Control Panel	Unified with individual bay handsets
Best For	Dealerships, Collection Storage
Certification	CE Marked
