4P CAR STACKERS

Commercial Heavy Duty Quad Stacker

Reinforced independent-post design rated at 3,000 kg per level — the highest per-platform capacity in the KETTP quad stacker range. Steel cable lifting with bidirectional boarding ramps at every level enables high-throughput commercial operations where rapid vehicle access from multiple directions is required. Designed for commercial parking operators, hotel valet systems and fleet maintenance facilities.

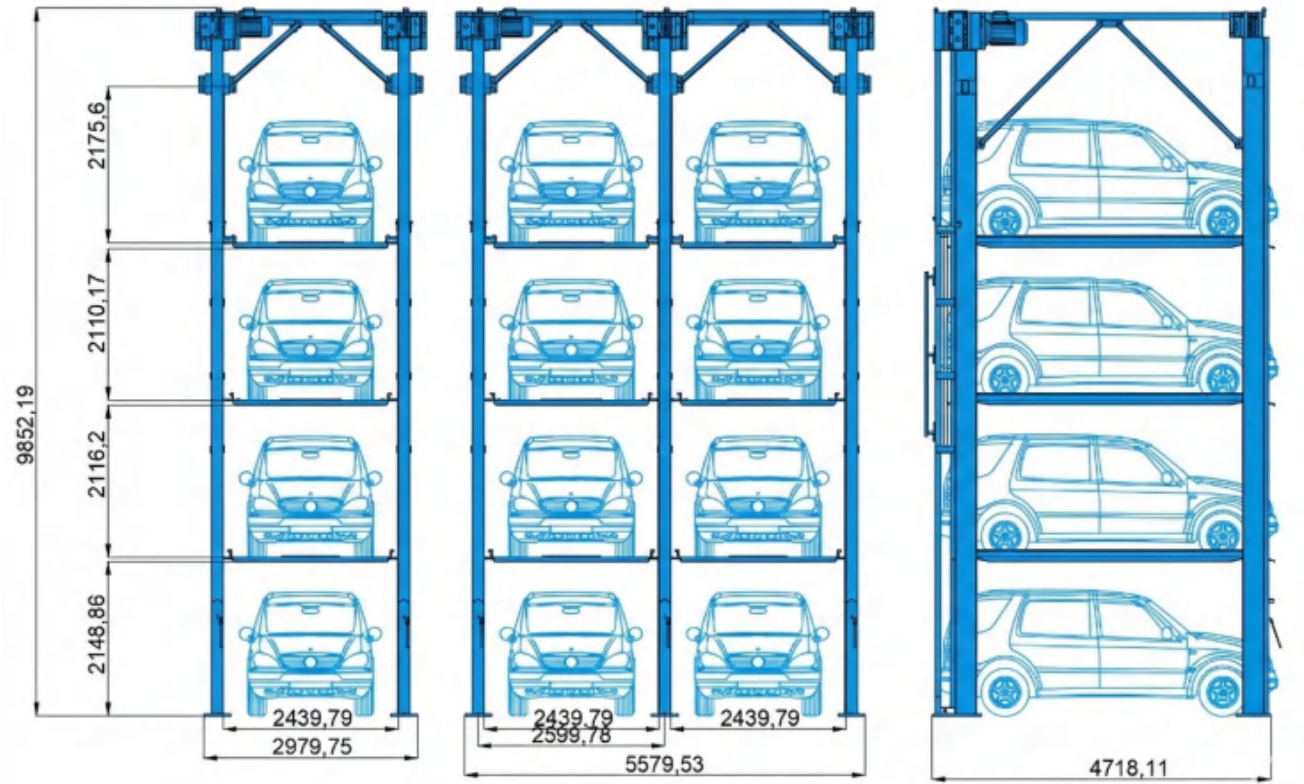

KEY FEATURES

- 3,000 kg per platform: highest capacity in the KETTP quad-stacker range
- Independent-post reinforced frame: shared-post, maximum rigidity per level
- Bidirectional boarding ramps at every level — vehicles can board and exit from either end
- Steel cable lifting system with redundant cable monitoring and automatic tension equalisation
- The most generous vehicle headroom in the Kettp quad stacker lineup — accommodates tall SUVs and crossovers on all four tiers.
- Anti-falling mechanical lock at every post, every level — independent of electrical power
- 24V DC control circuit with full PLC diagnostics display at master panel
- CE certified; built for commercial parking operators, hotels and fleet facilities

TECHNICAL SPECIFICATIONS

Rated Capacity	3,000 kg per platform
Levels	4
Drive System	Steel Cable (redundant monitoring)
Motor Power	7.5 kW
Column Configuration	Independent-Post Reinforced
Vehicles	4
Ramp Direction	Bidirectional at every level
Control System	Shared control system with multi units
Control Voltage	24V DC
Safety Locks	Mechanical, every post, every level
Best For	Commercial operators, Hotels, Fleet
Certification	CE Marked
