CAR TURNTABLES

Driveway Car Turntable

A whisper-quiet friction-drive turntable using five nylon-wheeled drive motors distributed around the circumference for near-silent, vibration-free 360° rotation. Available in shallow 185 mm pit-mount or surface-mount configurations — the decorable platform surface can be finished with any material to blend with driveway, showroom or parking surroundings. Wireless remote and Schneider PLC controlled.

KEY FEATURES

- 5× distributed nylon friction-drive motors: near-silent rotation without vibration
- 185 mm shallow pit option or surface-mount — minimal civil works required
- Decorable platform top: tile, stone, concrete, timber or resin finish
- Up to 15,000 kg capacity and 10,000 mm diameter — covers cars, SUVs and light vans
- 360° CW and CCW rotation with precise angular stop control via Schneider PLC
- Wireless remote handset + optional wall panel and smartphone integration
- Soft start, soft stop, CW and CCW rotation
- CE certified; ideal for driveways, showrooms and commercial parking facilities

TECHNICAL SPECIFICATIONS

Max Rated Capacity	15,000 kg
Max Diameter	10,000 mm
Drive System	5× Friction Nylon Drive (0.6 kW total)
Noise Level	Near-silent
Pit Depth	185 mm (shallow) or Surface Mount
Platform Surface	Decorable (any finish)
Rotation	360° CW & CCW
Control Power	DC 24V
Remote Control	Wireless handset + Manual
Surface Treatment	Electrostatic powder coating (standard) or hot-dip galvanizing (outdoor)
Best For	Driveways, Showrooms, Commercial
Certification	CE Marked
